INTRODUCTION

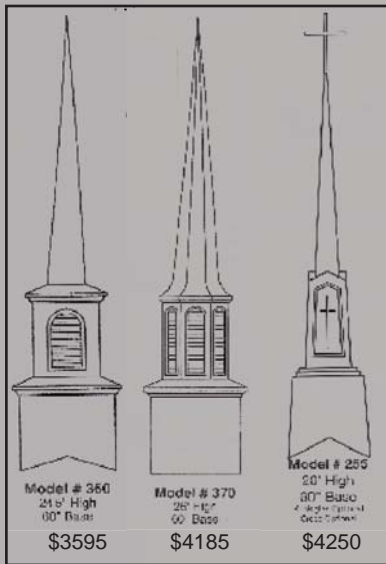

New steeples are manufactured from fiberglass resin materials in our modern manufacturing facilities. Our steeples have a molded in polyester gelcoat finish specifically designed for severe weather conditions. Steeples are designed also to withstand up to 100 MPH winds, subject to roof conditions. A beautiful steeple adds the crowning touch to a church, identifying the House of God and pointing the way towards Heaven.

HOW TO SELECT YOUR STEEPLE

When selecting a steeple, size is the most important consideration. You will want the steeple height to be approximately the same height as the building from the front peak to the ground. So if your building is 25' tall, choose a steeple that is 24'-26' in height. The width of the building should also be considered, and you will want the steeple width to be approximately 15% of the width of the building itself.

WINDOWS

In steeples with windows or louvered areas, Krinklglas windows can be added. Krinklglas is a Plexiglas style of stained glass. Interior lighting is available for an additional cost.

CROSSES and LIGHTNING PROTECTION

All steeples can have a cross added, and the lightning protection option is highly recommended. While fiberglass does not conduct electricity, if you receive a lightning strike during a rain storm, the rain water can actually carry the electric current into the building. Adding lightning protection can help prevent this from occurring. The church is responsible for grounding the wire to a ground rod.

INSTALLATION & DELIVERY

Steeple can also be installed locally by a crane or sign shop. Delivery available for the entire USA (additional cost for delivery and installation)

We can provide installation to area within 500 miles of Roanoke, AL.

HOW TO ORDER:

After selecting your steeple, we will need the following information:

1. Roof pitch
2. Roofing materials (shingle, metal, rubber, etc.)
3. Is there an attic area, and is there access to it?
4. Photos of church from the front and side where we can access the roof.
5. Two contact names and phone numbers (cell and home)

Wall Cross

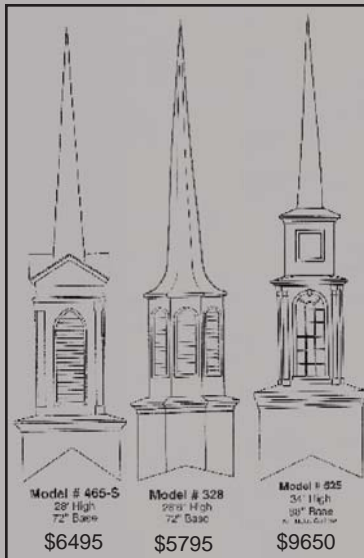

\$249 - 6'x3'
 Other Sizes Available
 Backlight - Add \$139
