

ALUMINUM CROSSES

8' Square Aluminium

- Durable, light weight, & weather-resistant.
- Can be used inside or outside.
- Can be roof-mounted, wall mounted, free-standing, suspended from the ceiling, or made to go on a steeple.
- Manufactured from high quality structural aluminum and hand-welded square aluminum tubing with aluminum brackets.
- The crosses are acid etched and painted with an epoxy paint. This paint is similar in chemical composition to fiberglass gel coating.
- Standard color is white but any color can be matched for a small fee.

BACKLIGHTING

We use commercial quality Rope Light to backlight our crosses.

Rope Light is made of highly durable solid PVC tube with a series of .46 watt miniature bulbs spaced 1" apart. 5.5 watts per foot, about 143 watts for a 6'-8' wall cross.

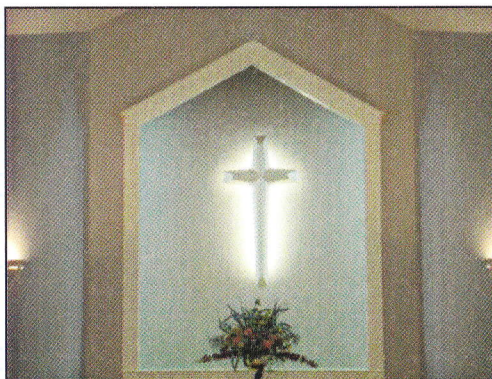

25,000 hour bulb life or about 8hrs. per day.

For indoor and outdoor use.

If it ever needs replaced a simple screw-driver and a few minutes time is all it takes.

Available in clear, red, purple, green, amber, pink, blue, and frosted white.

LED Lighting available upon request for additional charge.

FIBERGLASS WALL CROSSES

Sunburst Wall Cross

- Durable and weatherproof.
- Backlighting & mounting hardware available.
- Can be installed inside or outside.
- Standard color is white but any color can be matched for a small fee.
- See price list for cost.
