Pew & Pulpit Touch Up Services

Bringing new life to old church furniture!

An alternative to pew refinishing

Most of today's church furniture suffers from a lack of proper care. Wood is hydroscopic by nature; that is, it both absorbs and expends moisture, and expands and contracts in the heat and cold. Most churches do not keep their sanctuary at constant temperature and humidity levels, and the wood will move and the sealer (varnish, lacquer, etc.) will crack open, allowing moisture in. This is the natural process that, over time, will turn the wood back into the "dust of the earth", as God intended.

The proper maintenance of wood furniture (whether solid or veneer) includes polishing or waxing the furniture, keeping it sealed against moisture movement. Most churches do not have the ability or manpower to maintain their furniture, and refinishing is a very expensive alternative.(often the same price as new furniture).

Therefore, we are pleased to offer our reasonably priced furniture touch up services.....

On site complete furniture touch up by our professional crews in 2-4 days.

- Our "Pew Restore" processes will soften the existing finish and blend it with new stain to re-stain the entire area, while also cleaning the wood.
- Restores the original color & luster of the furniture
- Our "Feed & Wax" system will protect the furniture against moisture, using actual bees wax and carnauba wax, applied by hand waxing.
- Hides scratches and blemishes in wood, revives dull areas.
- A special "Orange Oil" solution will polish and maintain the restored look of your newly touched up furniture.
- Can be a "do-it-yourself" project, complete with video and instruction
